

Navina Mini Product Information

Product description

Low volume (185ml) transanal Irrigation device.

Shelf life and uses

All Navina Mini components have a shelf life of 2 years. The cone is a single use product and should only be used once. The water container and optional extension tube can be used 60 times.

Material composition

Main product components: water container, rectal cone and extension tube are made of thermoplastic elastomer (TPE).

Cone Hydrophilic Surface Coating: Polyvinylpyrrolidone (PVP).

Primary Packaging Material: Polyethylene (PE)

Secondary Packaging Material: Cardboard and Corrugated cardboard.

Navina Mini **are not manufactured** with latex, PVC or phthalates.

Intended use

Navina Mini is intended for Transanal Irrigation by instilling a low volume of water into rectum through a single use rectal cone.

Indications for use

Navina Mini is indicated for adults, adolescents and children from 3 years who suffer from incomplete emptying and/or fecal incontinence.

Contraindications

Do NOT use Navina Mini if you have one or more of the following:

- Known anal stenosis.
- Active inflammatory bowel disease.
- Acute diverticulitis and diverticular abscess.
- Colorectal cancer.
- Ischemic colitis.
- You are within three months of anal or colorectal surgery.

Since the list may not be exhaustive, healthcare professionals should always consider individual user factors as well.
